Profile

Cybersecurity-focused Computer Science Engineering student with hands-on experience in VAPT, web security, OWASP Top 10 testing, and security research. Published IEEE author with internships in vulnerability assessment and threat analysis. Seeking opportunities in SOC, VAPT, and Cybersecurity Analyst.

Education

2022 – 2026 **B.TECH**
Virudhunagar, India *Kalasalingam Academy of Research and Education*

Skills

Cybersecurity

VAPT, Penetration Testing, Web Security, Digital Forensics

Tools & Technologies

• Kali Linux, Metasploit, Burp Suite, Wireshark

Programming Languages

• Python, C

Networking Concepts

• TCP/IP, Firewalls, IDS/IPS, VPN

Languages

• Tamil • English • Telugu

Publications

Dynamic Noise Injection with On-Demand Bootstrapping (DNIB): A Robust Framework for Privacy-Preserving Data Analysis, IEEE ☑

BullyDetectX: A Privacy-Preserving, Severity-Aware, and Multilingual Cyberbullying Detection System Using Federated Learning and Explainable AI, IEEE ☑

Professional Experience

08/2025 – 11/2025 **Cybersecurity Intern**
Redynox
– Analyzed common web vulnerabilities (SQLi, XSS, CSRF)
– Performed OWASP Top 10 testing using ZAP Proxy and WebGoat
– Prepared security findings and professional vulnerability reports

Projects

Web Application Vulnerability Assessment using OWASP Top 10

Performed vulnerability assessment on web applications by identifying and analyzing OWASP Top 10 security risks.

Parallel Brute-Force Decryption Tool with Grammar Validation, IEEE

Developed a parallelized brute-force decryption tool with grammar-based validation to improve cracking efficiency

Bully Detect X – Online Cyberbullying Detection System

Federated Learning + Explainable AI based multilingual cyberbullying detection system

Patent Filed – Solar Power EV Charging Station
